

Water shut off notice

Pepper Townehomes has been informed that there are repairs needed on the backflow devices in the community.

In order to complete the repairs, Pacific Backflow will be shutting off the water
on levels 1, 2, and 3

on

Wednesday, February 26, 2025

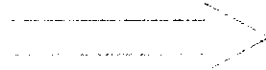

between

9:00 a.m. and 2:00 p.m.

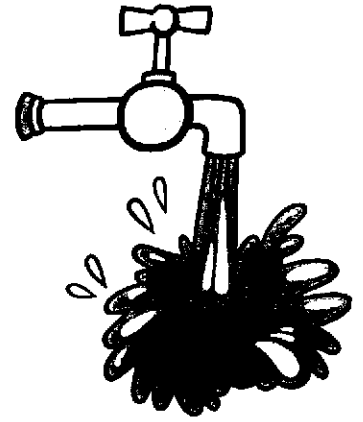

Please take care when using fixtures, and ***remember to shut fixtures off immediately***, even when no water is coming out, to ensure that they don't overflow when the water is turned back on!

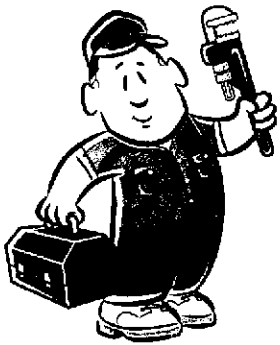

Please see reverse for additional information!

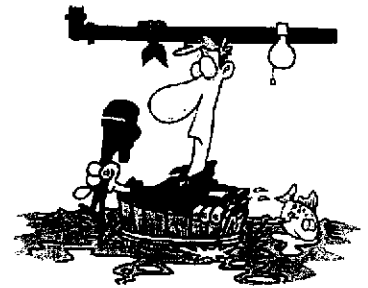

Once the water is turned back on, you may need to run your faucets for several minutes to bleed the air out of the lines. You may notice cloudy water for some time. This is also a result of air in the lines, and running the water should clear that up as well.

It is recommended that all residents inspect all fixtures, faucets, angle stops (the shut offs at the back of your toilets, washing machines and under the sinks), hot water heaters, etc. for leaks and be sure to have those repaired prior to the water being turned back on.

An already leaking fixture could create a larger problem when the water comes back on! The HOA will not be responsible for plumbing repairs or damage as a result of leaking fixtures.

If you have any questions or concerns, please contact the Management Office at 619-270-7360.

We apologize for any inconvenience and thank you for your cooperation!

Please see reverse for additional information!
